## 1. Introduction

For the compilation of External accounts statistics, consisting a.o. of the Balance of Payments Statistics and the International Investment Position of Aruba, information on foreign assets and liabilities should be reported to the Central Bank of Aruba (CBA). As of January 2018, the submission of information takes place through a web portal (in Excel format). In this guide an overview will be given of the reporting requirements in connection herewith.

### 1.1 Legal basis

The legal reporting obligation of a resident company is based on article 8 of the State Ordinance Foreign Exchange Transactions (SOFET) and the Decree on Balance of Payments Reporting Instructions 2017 (Decree RI 2017) (and related Notices concerning foreign exchange transactions). In this regard, it should be noted that the CBA has the responsibility for compiling and disseminating the External accounts statistics in accordance with international standards.

- ❖ The reports are to be filled out in Aruban florin<sup>1</sup> (USD 1 = Afl 1.79).

- ❖ Reporting period is chosen in the portal.
- ❖ There are situations in which additional information is necessary for the compilation of the external accounts of Aruba (e.g. settlements/disbursements of new debt and capital contributions). The company can be approached by the CBA regarding this information submission.
- ❖ Information on transactions (debit/credit, increase/decrease) should be provided on a gross-basis.
- ❖ The use of the “|” (pipe) symbol is not allowed when completing the forms.
- ❖ Country allocation refers to the country where the foreign asset or liability is held. One exception to this rule applies for the sheet “FBA-FIA-WMA Transactions”. In this case country allocation refers to the country related to the underlying transaction (for more elaboration refer to the section “FBA-FIA-WMA Transactions”).
