I. Main economic indicators

Monetary developments

In August 2022, money supply declined by AfI. 55.5 million to AfI. 5,376.3 million, compared to July 2022, resulting from decreases in both net foreign¹ assets (-AfI. 44.9 million) and net domestic assets (-AfI. 10.5 million) (See Chart 1).

Source: Centrale Bank van Aruba

Money, as a component of broad money, grew by Afl. 28.8 million to Afl. 3,398.1 million, resulting from an expansion in demand deposits (+Afl. 29.6 million) and a slight decrease in money in circulation (-Afl. 0.8 million). The growth in demand deposits was due to an increase in deposits denominated in Aruban florin (+Afl. 45.8 million) and a decline in deposits denominated in foreign currency (-Afl.16.2 million). In contrast, quasi-money dropped by Afl. 84.2 million to Afl. 1,978.2 million, due to decreases in time

deposits denominated in Aruban florin (-Afl.79.0 million) and savings denominated in Aruban florin (-Afl. 6.1 million).

Source: Centrale Bank van Aruba

The contraction in the domestic component of the money supply was caused by a decline in non-credit-related balance sheet items (-Afl. 31.2 million) and an increase in domestic credit (+Afl. 20.6 million). The rise in domestic credit was caused by a surge in the net claims of the banking sector on the public sector (+Afl. 33.1 million) and lower claims of the banking sector on the private sector (-Afl. 12.5 million). The growth in net claims of the banking sector on the public sector on the public sector was the result of a decline in government deposits (-Afl. 33.0 million). The decrease in claims of the banking sector on the private sector (Chart 2) was caused by lower loans to enterprises (-Afl. 11.2 million) and consumer credit (-Afl. 6.9 million), as well as higher housing mortgages (+Afl. 5.6 million).

In August 2022, the decline in net foreign assets of the banking sector was due to net sales of foreign exchange of Afl. 314.1 million

¹ Excluding revaluation differences of gold and foreign exchange holdings.

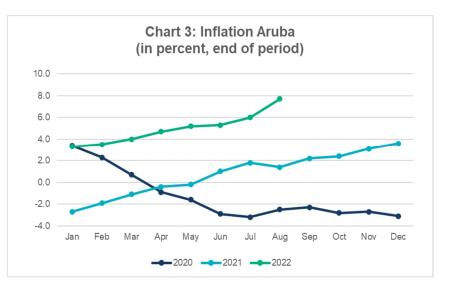

to the public, mainly associated with payments for goods imports. These were largely offset by net purchases of foreign exchange of Afl. 269.2 million from the public, mostly related to foreign exchange revenue from tourism exports (Table 1).

Table 1. Change in Net Foreign Assets (NFA) August	t 2022
(in Afl. million)

Inflation

The consumer price index (CPI) for August 2022 noted a 7.7 percent rise year-over-year (YOY) compared to a 6.0 percent increase (YOY) for July 2022 (Chart 3).

Source: Centrale Bank van Aruba

The main contributors to this increase were the "Housing," "Transport" and "Food and Non-alcoholic Beverages" components. In addition, the "Household Operation," "Recreation and Culture," "Restaurants and Hotels," "Miscellaneous Goods and Services," "Clothing and Footwear," and "Health" components also noted increases. The component "Communication" noted a decrease, while the other components remained unchanged. Furthermore, by excluding the effect of food and energy², the core CPI increased by 2.6 percent (YOY) (Table 2).

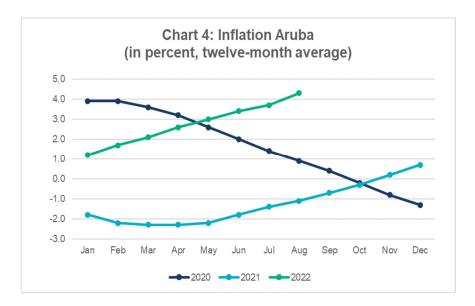

² Partly affects the housing and transport components.

Government

Total government revenue amounted to Afl. 96.3 million in August 2022, Afl. 7.8 million more than the same month of the previous year.

The expansion in government revenue resulted from an increase in tax revenue (+Afl. 9.7 million) and a decrease in nontax revenue (-Afl. 1.9 million).

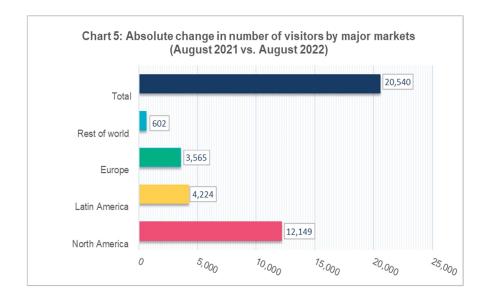

The growth in tax revenue was driven by expansion in income from turnover tax (B.B.O./B.A.V.P.) (+Afl. 2.7 million), wage tax (+Afl. 2.2 million), and transfer tax (+Afl. 2.2 million).

Tourism

The number of stay-over visitors amounted to 100,770 in August 2022, which is 20,540 visitors (+25.6 percent) more than in August 2021.

The North American market, the Latin American market, and the European market increased by 12,149 visitors (+17.7 percent), 4,224 visitors (+123.6 percent), and 3,565 visitors (+58.1 percent), respectively.

The surge in the North American market resulted from more arrivals from the United States (+10,067 visitors or +14.7 percent). The rise in the arrivals from the Latin American market was primarily due to more arrivals from Argentina, while the growth in the European market was due to more arrivals from Italy and the United Kingdom. In the month under review, the total number of nights spent in Aruba, as indicated by the visitors, increased by 21.6 percent to 689,891 as compared to the corresponding month for the year 2021. The average intended night stays experienced a decrease from 7.1 nights in August 2021 to 6.8 nights in August 2022. The number of cruise visitors amounted to 32,063 in August 2022 and the number of ship calls was 10.

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.

2) Tourism credits is compiled from transactions in foreign currency, traveler's checks, and credit cards, as reported by the foreign exchange banks.
