CENTRALE BANK VAN ARUBA

Cover design:

Mangroves are hotspots of biodiversity, connecting life on land with life below water. These 'forests of the sea' are essential to the health and vibrancy of our coastal ecosystems, including our community livelihoods. They provide a vital habitat for marine life, help to protect against coastal erosion and storm surges, as well as filter pollutants from the sea. Mangroves are one of nature's most effective tools in the fight against climate change and are integral to nature.

I. Main economic indicators

Monetary developments

In September 2023, money supply contracted by Afl. 43.1 million to Afl. 5,558.6 million, compared to August 2023, resulting from a decrease in net foreign¹ assets (-Afl. 205.8 million) and an increase in net domestic assets (+Afl. 162.7 million) (See Chart 1).

Source: Centrale Bank van Aruba

Money, as a component of broad money, dropped by Afl. 32.3 million to Afl. 3,426.6 million, mainly due to a decline in demand deposits (-Afl. 32.1 million). The contraction in demand deposits resulted from decreases in deposits denominated in both foreign currency (-Afl. 28.3 million) and Aruban florin (-Afl. 3.8 million). Quasi-money declined by Afl. 10.8 million to Afl. 2,131.9 million, due to a decrease in time

deposits denominated in Aruban florin (-Afl. 35.6 million) and an increase in savings deposits denominated in Aruban florin (+Afl. 25.0 million).

In September 2023, the contraction in net foreign assets of the banking sector was due to net sales of foreign exchange of Afl. 460.9 million to the public, mainly associated with payments for goods imports and portfolio investment. These were largely offset by net purchases of foreign exchange of Afl. 255.1 million from the public, mostly related to foreign exchange revenue from tourism exports (Table 1).

Net purchases of foreign exchange	255.1

The development in the domestic component of the money supply was caused by an expansion in domestic credit (+Afl. 170.4 million) and a decrease in non-credit-related balance sheet items (-Afl. 7.7 million). The growth in domestic credit was due to higher net claims of the banking sector on the public sector (+Afl. 158.1 million) and higher claims of the banking sector on the private sector (+Afl. 12.3 million). The increase in net claims of the banking sector on the public sector was the result of decreases in government deposits (-Afl. 164.1 million) and gross claims (-Afl. 6.0 million). The growth in claims of the banking sector on the private sector (Chart 2) resulted from increases in consumer credit (+Afl. 11.7 million) and housing mortgages (+Afl. 6.8 million), while loans to enterprises decreased (-Afl. 6.2 million).

Inflation

The consumer price index (CPI) for September 2023 noted a 1.7 percent rise year-over-year (YOY), compared to a 0.5 percent increase (YOY) for August 2023 (Chart 3).

Source: Centrale Bank van Aruba

The main contributors to this increase were the “Communication,” “Food and Non-alcoholic Beverages,” “Housing,” and “Miscellaneous Goods and Services” components. In addition, the components “Household Operations,” “Restaurants and Hotels,” and “Education” also noted an uptick. The components “Recreation and Culture,” “Transport,” and “Clothing and Footwear” noted decreases, while the other components remained unchanged.

Furthermore, by excluding the effect of food and energy², the core CPI rose by 1.6 percent (YOY) (Table 2).

Government

Total government revenue amounted to Afl. 159.7 million in September 2023, Afl. 62.0 million more than the same month of the previous year.

The expansion in government revenue resulted from increases in tax revenue (+Afl. 32.3 million) and nontax revenue (+Afl. 29.7 million).

The growth in tax revenue was mainly driven by the expansion in income from profit tax (+Afl. 13.3 million), turnover tax (B.B.O./B.A.V.P.) (+Afl. 12.6 million), hotel room tax (+Afl. 5.0 million), and wage tax (+Afl. 2.8 million). In contrast, income from transfer tax decreased (-Afl. 2.6 million).

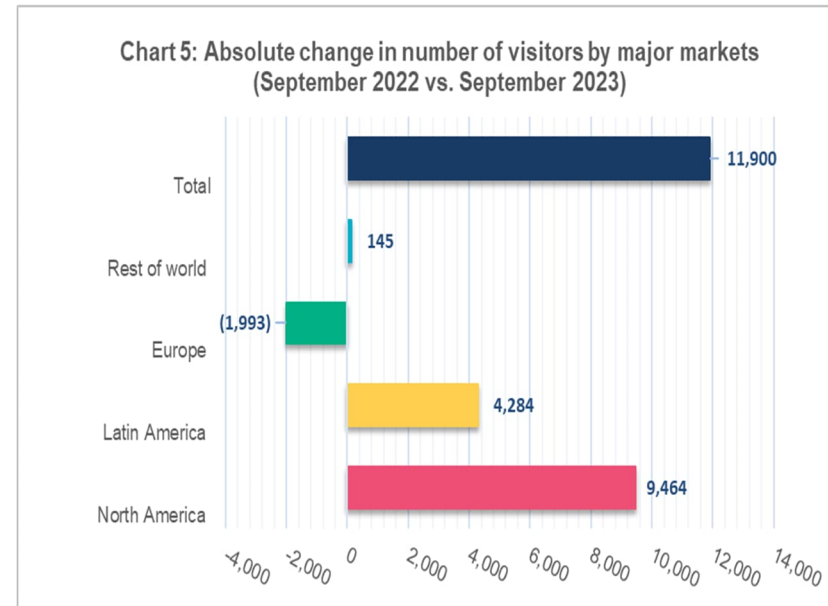

Tourism

The number of stay-over visitors amounted to 90,161 in September 2023, which was 11,900 visitors (+15.2 percent) more than in September 2022.

The North American market and the Latin American market increased by 9,464 visitors (+16.0 percent), and 4,284 visitors (+51.1 percent), respectively. In contrast, the European market fell by 1,993 visitors (-24.6 percent).

The surge in the North American market mainly resulted from more arrivals from the United States (+8,913 visitors or +15.6 percent). The rise in the arrivals from the Latin American market was primarily due to more arrivals from Colombia, while the drop in the European market was mostly driven by less arrivals from the United Kingdom, the Netherlands, and Italy.

In the month under review, the total number of nights spent in Aruba, as indicated by the visitors, increased by 32.4 percent to 724,352 as compared to the corresponding month for the year 2022. The average intended night stays experienced an increase from 7.0 nights in September 2022 to 8.0 nights in September 2023. The number of cruise visitors amounted to 27,117 in September 2023 and the number of ship calls was 10.

* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

** Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

*** Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.

2) Tourism credits is compiled from transactions in foreign currency, traveler's checks, and credit cards, as reported by the foreign exchange banks.
