Cover design:

Mangroves are hotspots of biodiversity, connecting life on land with life below water. These 'forests of the sea' are essential to the health and vibrancy of our coastal ecosystems, including our community livelihoods. They provide a vital habitat for marine life, help to protect against coastal erosion and storm surges, as well as filter pollutants from the sea. Mangroves are one of nature's most effective tools in the fight against climate change and are integral to nature.

## I. Main economic indicators

### Monetary developments

In March 2024, money supply rose by Afl. 62.0 million to Afl. 5,812.9 million, compared to February 2024, resulting from an increase in net domestic assets (+Afl. 114.2 million) and a decrease in net foreign<sup>1</sup> assets (-Afl. 52.2 million) (See Chart 1).

Source: Centrale Bank van Aruba

Money, as a component of broad money, grew by Afl. 8.4 million to Afl. 3,481.1 million, due to expansion in demand deposits (+Afl. 4.9 million) and in currency in circulation (+Afl. 3.5 million). The growth in demand deposits resulted from increases in deposits denominated in Aruban florin (+Afl. 4.6 million) as well as in deposits denominated in foreign currency (+Afl. 0.4 million). Quasi-money surged by Afl. 53.6 million to

Afl. 2,331.8 million, due to increases in both time deposits denominated in Aruban florin (+Afl. 51.9 million) and savings deposits denominated in Aruban florin (+Afl. 4.1 million).

In March 2024, the contraction in net foreign assets of the banking sector was due to net sales of foreign exchange of Afl. 414.5 million to the public, mainly associated with payments for goods imports and portfolio investment. These were largely offset by net purchases of foreign exchange of Afl. 362.4 million from the public, mostly related to foreign exchange revenue from tourism exports. (Table 1).

Net purchases of foreign exchange	362.4
Tourism services	306.9

<sup>1</sup> Excluding revaluation differences of gold and foreign exchange holdings.

The development in the domestic component of the money supply was caused by a surge in domestic credit (+Afl. 118.1 million) and a decline in non-credit-related balance sheet items (-Afl. 3.9 million). The increase in domestic credit resulted from higher net claims of the banking sector on the public sector (+Afl. 118.5 million) and lower claims of the banking sector on the private sector (-Afl. 0.4 million). The expansion in net claims of the banking sector on the public sector was due to a drop in government deposits (-Afl. 118.3 million). The decrease in claims of the banking sector on the private sector (Chart 2) resulted from decreases in consumer credit (-Afl. 3.6 million) and loans to enterprises (-Afl. 2.4 million), and an increase in housing mortgages (+Afl. 5.7 million).

## Inflation

The consumer price index (CPI) for March 2024 noted a 1.8 percent rise year-over-year (YOY), compared to a 0.9 percent increase (YOY) for February 2024 (Chart 3).

Source: Centrale Bank van Aruba

The main contributor to this increase was the “Communication” component. In addition, the components “Food and Non-alcoholic Beverages,” “Housing,” “Miscellaneous Goods and Services,” “Household Operations,” “Education,” “Restaurants and Hotels,” and “Clothing and Footwear” also noted an uptick. The component “Transport” noted a decrease, while the components “Beverages and Tobacco Products,” “Health,” and “Recreation and Culture” remained unchanged. Furthermore, by excluding the effect of

food and energy<sup>2</sup>, the core CPI rose by 2.2 percent (YOY) (Table 2).

## Government

**Total government revenue amounted to Afl. 123.5 million in March 2024, Afl. 15.4 million more than the same month of the previous year.**

The expansion in government revenue resulted from an increase in tax revenue (+Afl. 19.4 million) and a decrease in nontax revenue (-Afl. 3.9 million).

The growth in tax revenue was mainly driven by the expansion in income from turnover tax (B.B.O./B.A.V.P.) (+Afl. 5.9 million), foreign exchange tax (+Afl. 5.2 million), wage tax (+Afl. 2.8 million), and transfer tax (+Afl. 2.2 million).

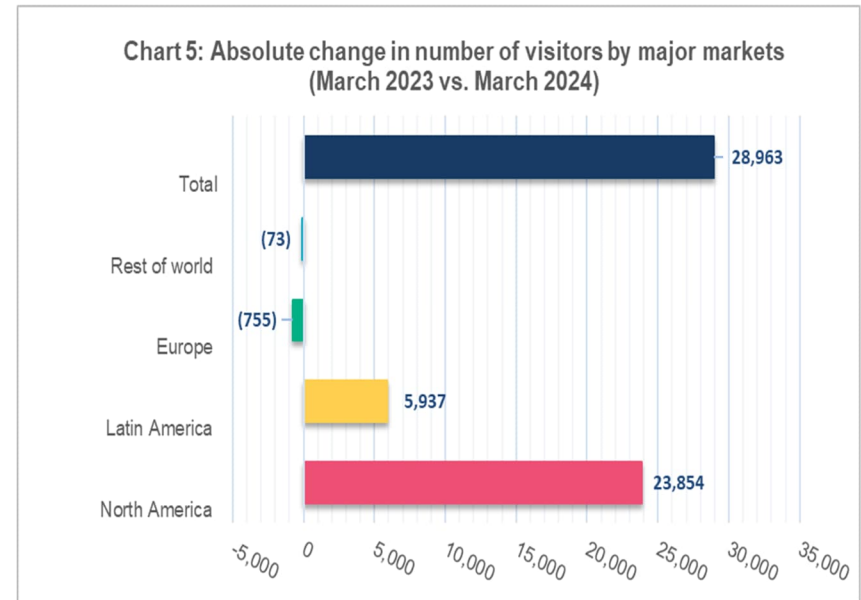

## Tourism

**The number of stay-over visitors amounted to 141,380 in March 2024, which was 28,963 visitors (+25.8 percent) more than in March 2023.**

The North American market and the Latin American market increased by 23,854 visitors (+25.1 percent) and 5,937 visitors (+73.5 percent), respectively. In contrast, the European market fell by 755 visitors (-11.5 percent).

The surge in the North American market mainly resulted from more arrivals from the United States (+22,799 visitors or +26.2 percent). The rise in the arrivals from the Latin American market was primarily due to more arrivals from Colombia, Peru, and Argentina. The drop in the European market was mostly driven by less arrivals from Germany and the Netherlands.

In the month under review, the total number of nights spent in Aruba, as indicated by the visitors, increased by 21.1 percent to 1,024,579 as compared to the corresponding month for the year 2023. The average intended night stays experienced a decrease from 7.5 nights in March 2023 to 7.2 nights in March 2024. The number of cruise visitors amounted to 117,701 in March 2024 and the number of ship calls was 46.

\* The monetary survey consolidates the accounts of the Centrale Bank van Aruba, the commercial banks and the Government related only to the issuance of components of the money supply, i.e., coins and treasury bills. This survey shows the financial relationship between the monetary sector, whose liabilities include the money supply, and other sectors of the economy.

\*\* Gross claims include loans granted as well as government bonds in the hands of the monetary sectors and claims resulting from the issuance of treasury bills, cash certificates, and coins.

\*\*\* Revaluation differences of gold and official foreign exchange holdings are excluded in order to approximate the net import of foreign funds by the nonmonetary sectors.

1) The Diversification Index measures the concentration within the tourist market, and thus demonstrates the degree of diversification by tourist origin countries. The higher the index, the higher the level of concentration, meaning less diversification. For further reference on the methodology (which is an application of a Herfindahl-Hirschman index) see the Quarterly Bulletin (2011-I) of the CBA.

2) Tourism credits is compiled from transactions in foreign currency, traveler's checks, and credit cards, as reported by the foreign exchange banks.
